

DIGITAL IMAGE STORAGE AND DIGITAL IMAGE STORAGE SYSTEM

Abstract of Disclosure

A digital image storage includes a connector for communicating with a digital camera and a detector that detects a signal to cause the transmission of a digital data from a memory of the digital camera to the digital image storage. The digital image storage further includes a function unit responsive to the signal from the detector to carry out the transmission of the digital data of images with the other digital data not transmitted and a storage medium that stores the transmitted data of images.
